## MESSAGE FROM OUR CEO

Welcome to Afrigha Surrogacy, where hope, care, and professionalism come together to support your journey to parenthood. We are a dedicated surrogacy agency built on compassion, transparency, and a deep respect for both intended parents and the women who selflessly help make families possible.

At Afrigha Surrogacy, we believe that every family's journey is unique. Over the years, we have carefully developed ethical, well-structured processes that place the well-being of our surrogates and the confidence of our clients at the center of everything we do.

Our experienced team provides guidance, medical coordination, and emotional support at every stage of the process.

To reflect the diverse needs of our clients, we have designed a range of clearly defined packages. Each package outlines what is included at every step of the surrogacy journey, allowing you to choose an option that best aligns with your goals, preferences, and budget, without compromising on quality of care.

As you explore our packages, please know that Afrigha Surrogacy remains committed to walking with you with honesty, compassion, and professionalism, from the very first conversation to the moment your family is complete.

**Akosua N. Asamoah**

# CLIENT REVIEWS

## FLORIAN JOOS

My little son was born with the help of Afrigha, and I tried for a very, very long time to become a father. The whole surrogacy process is very transparent and well structured. You are picked up at the beginning, taken along and always informed about what is going on. They are very responsive to the wishes of the intended parents and ensure that everything runs smoothly. For example, the official birth certificate was there in no time at all. Akosua and her friendly and very professional team made my wish come true. I am infinitely grateful to them.

Many thanks to the entire Afrigha team.

## ADWOA ABOAGYE

Absolutely the best surrogacy agency I have ever encountered. Prior to working with Afrigha I interviewed agencies in Mexico, Colombia, and US. The professionalism and communication surpasses them all. Akosua and the team are truly a blessing to anyone on this journey. I am truly appreciative of her and her team. Surrogates are truly respected during this process as well as intended parents. The embryologist and gynecologist were available to answer all my questions and concerns when needed. I have recommended Afrigha to several other parents embarking on this journey and they are also impressed with Afrigha so much they have also started their journey in Ghana with Afrigha.

If I could give this agency 10 out 5 stars I would.

## AMINA

Afrigha surrogacy is a place i will choose over and over again 🙌🔥 how they treated me when I went there is awesome 🔥. They make me feel at home And what i love about them is they are caring and always choose surrogate over everything ❤️. God bless 🙏❤️ Madam Akosua and the staff for being so kind to me I love you all.

## REJOICE

When I came to Afrigha, I saw plenty things and everything I was told was exactly the same thing I experienced, food, clothes and beautiful rooms to sleep inside ,medication was giving and also when you're sick they will send you to the hospital on time and their midwife is a very nice person and also the parent coordinator is a very good person, so I truly recommend any lady who want to be a surrogate to come to Afrigha home because they are the best .

# FREQUENTLY ASKED QUESTIONS

## **Do we need to travel to Ghana to start the process?**

If you opt to send frozen embryos, you and the surrogate can digitally sign the contract together with a notary.

## **Can we stay in touch with our surrogate during pregnancy?**

This depends on the relationship between the Intended Parents and their surrogate and all of their expectations regarding contact. Some Intended Parents prefer less contact with their surrogate and some prefer to be more involved. It is important that these expectations are discussed with us prior to matching with a surrogate to ensure a successful arrangement.

## **Will our surrogate agree to any medical procedures that may be necessary to deliver a healthy baby?**

Within our contractual agreement, the surrogate is legally obligated to undergo all requisite medical procedures essential for ensuring the birth of a healthy baby. It is imperative to highlight that this contract holds enforceable status, providing assurance and accountability for all parties involved.

## **How do we guarantee the surrogate relinquishes custody of the baby after birth?**

Under Ghanaian law, prenatal and postnatal rights for the child firmly belong to the Intended Parents. Our priority is to provide a warm and supportive environment while adhering to these legal guidelines. The surrogate receives final payment only after the birth certificate is issued to you.

## **What legal steps establish parental rights after birth?**

After the baby is born, intended parents typically need to take legal steps to establish their parental rights. This often involves legal procedures such as obtaining a court order or completing the necessary paperwork to establish parentage. Afrigha maintains a dedicated team of legal experts who handle all legal procedures to establish parental rights post-birth.

**Who ensures the well-being of the baby during pregnancy?**

An experienced live-in midwife oversees the well-being of both surrogate mothers and the precious babies they carry. Our team also includes a skilled cook and dedicated cleaner who attend to the daily needs of our residents. From preparing nourishing meals tailored to their dietary requirements to maintaining a pristine and comforting environment, everyone receives exceptional care and attention during their time with us.

**How do I get breastmilk for my child after birth?**

Intended parents are required to provide an electric breast pump and breast milk storage bags. The surrogate will express the breast milk and store it safely in the provided bags. Once expressed and stored, intended parents are expected to make arrangements for the collection of the breast milk from our office. This process ensures proper handling, storage, and convenience for all parties involved.

Some miracles arrive in an instant, others take nine months
